Imaging, Document Management, and Workflow Project Implementation
MSA Contract Number: 5-03-70-82

IBM Global Services is the world's largest business and IT services provider, and a recognized leader in imaging, document management, and workflow project implementations. We provide end-to-end service delivery, offering our clients a blend of consulting experience with our hardware and software services. As a result, we not only recommend client solutions, but also implement them. IBM offers a full range of professional services to leading public and private sector organizations, companies, institutions, and municipalities throughout the world. With our partner relationships with Adobe Systems and Verity, Inc., through this MSA, we are able to offer the State of California products that will help meet state agencies' varying business needs.
